## Universal Fit - Safety Stand for Disposable Barbeques

Protect tabletops and improve safety with this compact instant disposable barbeque stand, patent GB2405785. The lightweight, reusable frame accommodates virtually any size of disposable barbeque, including standard and party-sized trays through the use of an adjustable divider system. No assembly is required and the support legs fold-up to minimise retail, transportation and storage space.

### Introduction

Instant disposable barbeques can burn tabletops, cause ground fires in certain circumstances and leave behind hot surfaces that can scald unprotected skin.

The Universal Fit is a safe and easy-to-use disposable barbeque stand. By elevating the barbeque tray itself, the danger of damaging plastic, wooden and glass surfaces is eliminated.

Simply position standard or party-sized disposable barbeque trays in the frame and you're ready to cook! Alternatively use an optional firebox with regular bagged charcoal for conventional barbeque functionality.

The Universal Fit safety stand is ideal for domestic use - in the backyard or garden and on balconies, patios and decking.

Its convenient size and weight makes it perfect for picnics and will help users to avoid burning the ground-surface on which it is used.

### Technical Information

- Rim-support structure provides safe operation
- Robust and durable painted sheet metal construction
- Folds flat for minimal retail shelf space
- Point-of-sale branding: printed cardboard sleeve
- Size: 130mm / 25mm (h) x 510mm (w) x 310mm (d)

Also available: **Safety Stand for Disposable Barbeques - DH300**

An adaptable platform that combines disposable barbeque convenience with conventional barbeque functionality. This dual-function, reusable stand - patent GB2405785 - accommodates virtually all disposable barbeque tray sizes. A removable, lift-out firebox is also available for the alternative use of bagged charcoal. Assembly is required with this model, which is supplied flat-packed to the end-user.

Also available: **Safety Stand for Disposable Barbeques - DH100**

Protect table tops and improve safety with this instant disposable barbeque stand, patent GB2341538. This lightweight, reusable frame accommodates standard-sized disposable barbeque trays in the upright position and party-sized trays in the upturned position. They can be stacked for efficient utilisation of retail shelf and storage space, and there is no assembly required thanks to one-piece construction.

The Universal Fit disposable barbeque stand is of a rim-support frame design which provides an incredibly stable cooking surface making it virtually impossible to displace the barbeque tray when knocked.

Ideal for people wanting to cook for either one or two individuals, or an entire group using multiple barbeque trays and stands.

Specific technical and functional requirements can be accommodated with our advanced design service. Please contact us to discuss your individual needs.
